

*Do you remember how was the experience
of choosing a university and a city to live in?*

So do we.

Education & Science

*How do we offer better support for citizens
concerning career and educational choice?*

Impact

Students

Cities

Universities

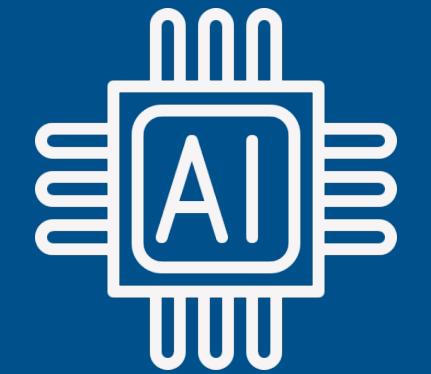

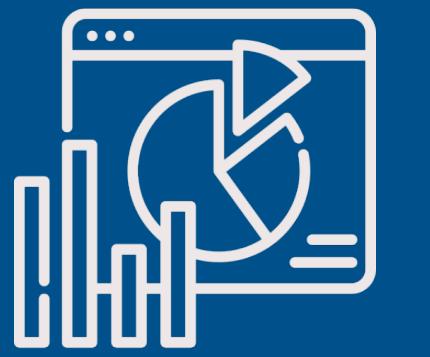

Combining more than 10 datasets we are able to give a solution that matches to the user's preferences

Average age per region, Land Distribution , Population Density, Workplaces, Transport Facilities, Number of ancient sites by region, Average temperature, Universities...

Valuable inputs. Valuable outputs.

*AI algorithms to
maximize result
accuracy*

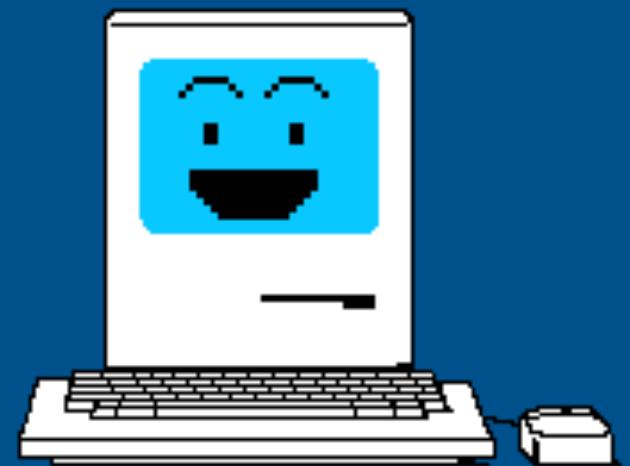

*Exhaustive
datasets analysis*

*User input
creates more
open data*
